gen·er·a·tor

[jen-uh-rey-ter] [Show IPA](#)

noun

1. a machine that converts one form of energy into another, especially mechanical energy into electrical energy, as a dynamo, or electrical energy into sound, as an acoustic generator.
2. a person or thing that generates.
3. *Chemistry* . an apparatus for producing a gas or vapor.
4. *Mathematics* .
 - a. an element or one of a set of elements from which a specified mathematical object can be formed by applying certain operations.
 - b. an element, as a line, that generates a figure.
5. *Computers* . a program that produces a particular type of output on demand, as random numbers, an application program, or a report.
